MESHAPI
1 Meshapi Gateway
→ Single key access to 1000+ embeddings and models
2 Meshapi CLI
→ use Meshapi in your CLI just like claude code as coding agent
3 Meshapi MCP
→ use MCP features for CLI coding agent, toolbox for agents

Problems Output Debug Console **Terminal** Ports Jupyter

✓ key saved → C:\Users\divesh\.meshapi\credentials (0600). The MESHAPI_API_KEY env var overrides it; /login replaces it.

```
 ✦ meshapi 0.5.5
 cwd:   D:\meshapi
 model: anthropic/claude-sonnet-4.5
 route: off

 type /help for commands, /exit to quit
```

Done. `generated_hinglish_speech.wav` (~176KB, ~5-6 seconds).

- **Model picked**: `sarvam/bulbul:v2` — Sarvam AI specializes in Indian languages, a much better fit for Hinglish than the English-only `hexgrad/kokoro-82m` I used in `features.ipynb` earlier, or ElevenLabs' general multilingual models.
- **Voice**: `meera`
